

vfast parks

An isometric illustration of a park or resort. In the center, a red signal tower with three concentric circles above it emits a signal. Surrounding it are various types of accommodations: several white houses with dark roofs and balconies, some with antennas on their roofs; two brown dome-shaped huts; two white vans with antennas on their roofs; and three tan tents. People are engaged in various activities: walking, jogging, cycling, sitting on a bench, playing with a dog, and sitting at a picnic table. There are also trees, a pond with ducks, and a path. A yellow circle with a black border contains the text 'Fast, dedicated internet connections to individual units'.

home from home with **Superfast Internet**

What is Vfast Parks?

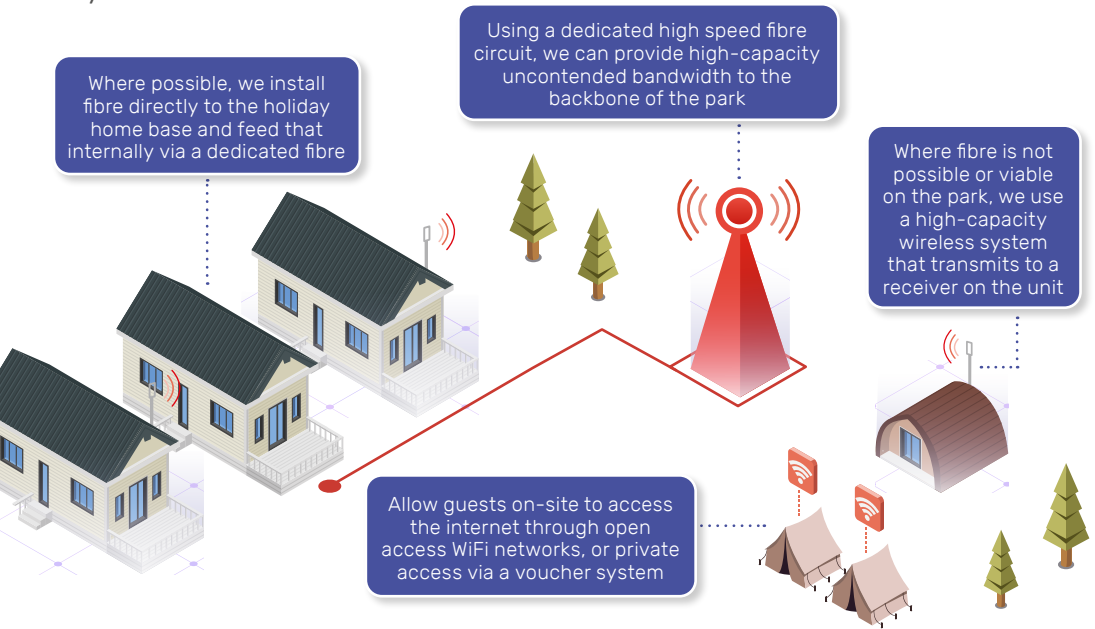

Vfast Parks is a dedicated division of Vfast Ltd, part of the Orbital Internet Group. The Vfast Parks division was created in order to better serve the Holiday home sector with dedicated professional resources. With Vfast Parks being part of the Orbital Internet Group, we have the resources to be a 'one-stop-shop' for both Consumer and Business connectivity. Vfast parks are able to leverage the large scale wide area fibre internet backbone of Orbital Net making our solutions both best in class and cost effective.

How does it work?

A typical project will involve a dedicated high speed fibre circuit back to our core network. Locally on the park, the usual configuration would be a mix of fibre, high capacity backhaul wireless working in the 60ghz spectrum and local distribution gateways.

Once the service is inside a holiday home, we then distribute using a typical home type WiFi router, which of course, also has ethernet available for Sky boxes and smart television.

If fibre is not possible or viable, a receiver is added on the holiday home to connect to a wireless system. Ethernet then carries the service to a point inside and we distribute in the same way as direct fibre via a router.

A one-stop-shop for Wifi and Fibre

Whether you're on a smartphone, tablet or laptop, we understand the need for high-speed reliable internet no matter the location, or how many people are using the same connection.

Fast, reliable internet

Give your owners and holiday guests a best-in-class internet service direct to their holiday home or accommodation.

24/7 network support

We know that even at the best of times, occasionally things go wrong.

Competitive pricing

Cost saving on your existing corporate connectivity.

High speed streaming

Guests and owners can watch films and boxsets on streaming services, such as Netflix.

Earn additional revenue

Ability to earn revenue from voucher systems for your guest and owner internet service.

Added value

Attract customers for holiday home sales and enhance guests holiday experience.

Customer support

Access to our expert team to help and answer any questions you may have.

What makes us different?

We offer a dedicated internet connection to each individual holiday home. This enables us to reliably provide high internet speeds. We do this via a mix of technologies using wireless fibre and fibre solutions. **The one thing we guarantee is full park coverage to be able to serve all your customers.**

Owners can benefit from in home private networks with their own dedicated routers. This enables them to stream their favourite films, download their favourite music, and keep up to date with friends and family.

Internet access is a very important part of people's lives today, and they shouldn't have to put up with second best in their holiday home. We know from the volume of pictures and videos owners post online that they delight in sharing their holiday memories, so now we have a fantastic WiFi product to match.

— Tony Clish, Park Holidays Director

PARK HOLIDAYS

Contact our team:

Our Commercial Solutions

We appreciate every Park is different, and we will work with you to provide a system that is fit for purpose, not only for you as an operator but your customers.

Solution VFP1

Fully Managed, Supported and funded by Vfast

Delight your customers with a superfast internet service, provided directly from Vfast. We fund the infrastructure rollout, with the Park Operator incurring no financial burden. All contact with the end user is handled via the Vfast customer service desk with sales advice and technical support.

Solution VFP2

Fully Managed, Supported by Vfast and including Hire Fleet installations

Includes all the benefits of VFP1 with the addition of all hire fleet bases having connectivity from a dedicated access point located inside the unit. This can be configured as an open access system or a revenue earning network.

Solution VFP3

Custom Solution

Includes all the benefits of VFP1 and VFP2 but tailored to the requirements of the Park Operator. Typically this package will involve investment from both Vfast and the Park Operator. We can manage any corporate connectivity requirements as part of this package.
